Recruitment Task

Phase I

Question 1 – Answer:

Yes, I would like to find out the followings:

- What's the unsuccessful login message which should be displayed when the wrong login or password was entered?

- On what page should the user be taken after login? Dashboard page maybe.

- Does the account need to be activated before being able to log in? Let's assume yes.

- Does the platform has paid memberships? If yes, then what should happen when a user with an expired membership tries to log in? Let's assume no.

- Does the login page have a Forgot Password link? Let's assume yes.

- Does the Login page use a CAPTCHA? Let's assume no.

- What's the maximum number of allowed attempts? Let's assume it's 5.

- Does the login page have a Remember Me option? Let's assume no.

- Does the logged in user has a certain role associated? If so, to what pages does the logged in user have access to? In other words what modules is the logged in user allowed to access? Let's assume there are no roles, all users have access to same pages.

- Do all users log in using the standard login or are there users singing in using SSO? Let's assume all users use the standard login.

- Does the site have the option to login using an existing Facebook/Twitter/Google account? Let's assume no

Question 2 – Answer:

- See login.feature from the project below.
